

Construction £200k | Invoice Finance Plus

This business, operating in a specialist area within the wider construction sector, had a traditional invoice finance facility

However, how they traded with their customers was changing and the work they were winning was of a higher value, which led to a mix in debt type and the incumbent funder was restricting funding accordingly

We offered them a traditional invoice finance facility plus an overpayment secured by way of a debenture and first charge over property

Food Manufacturer £700k | Business Finance

Wales based food manufacturer needed funds to assist with debt restructuring of initial start-up costs

We stepped in and facilitated a loan which will save this business thousands of pounds in interest costs associated with the previous lenders

Reward was introduced to this business by an existing client

Hospitality £300k | Business Finance

A North Wales hotelier approached his bank and had terms agreed for a refurbishment loan – then, once the work was under way the bank said they couldn't release the funds

We stepped in, working to an extremely tight deadline, and turned the Business Finance loan around in seven days – as the building contractor needed paying and fixtures and fittings ordering

The first guests have now stayed and the venue will be a great asset as a 'staycation' venue in the UK
