

Nightclub Operator
£332k | Business Finance

Full refinance facility needed for a successful nightclub to allow the current owner to step back to the role of landlord

Following this, a lease will be provided to new management with work focusing on further expansion for the business

The deal will also allow further development in the building itself

Brought forward by a well-known introducer, who we have done numerous deals with to date

Garden Centre
£1.3m | Business Finance

A successful garden centre operator, who was generating significant profits, wanted to develop the prominent 3.79-acre site to create an additional retail destination, to include a food hall, restaurant, outdoor seating area and car parking

Reward was approached for funding as, after months of involvement, the intended lenders onerous pre-lending requirements were delaying completion

Reward made a facility available for drawdown within two weeks and the sensational new venue is now well on track for an imminent opening

Specialist Industrial Engineer
£200k | Asset Based Solutions

A specialist engineering company, which repairs, services and maintains industrial freezers for blue chip accounts, required a working capital facility to pay its increasing number of sub-contractors as the business goes from strength-to-strength

It is a returning client having been with another lender, which had disappointed them with the service levels and, having been quoted a 'cheaper' deal, was upset when hit by additional hidden charges

With an excellent track record as a previous Reward client, and security in place, the facility was quickly arranged
